WILDERNESS OFFICIAL PLANS
MONTANA WATER TALK

MISSOULA, MONTANA---

John Hall, assistant director of the Wilderness Society, Washington, D.C., will present the final lecture on water problems of the Pacific Northwest Wednesday on the University of Montana campus.

Dr. Richard L. Konizeski, forestry professor of hydrology and coordinator for the 10-lecture series, said Hall's talk entitled "Montana Water Development" will integrate the essence of the previous nine talks and its application to Montana's water problems.

He will speak at 1 p.m. Wednesday in Chem-Pharm 109. The interested public is welcome to attend the School of Forestry sponsored lecture.

Hall is a forester by training and experience. He has a forestry Bachelor of Science Degree from Penn State and a masters from Yale University.

He served the United States Forest Service for 16 years at the Alaska Forest Research Center, the Bitterroot National Forest, the Flathead National Forest, and as Information and Education Director for the Eastern National Forest Region in Milwaukee, Wis.

While at his Alaska post, Hall dealt with watershed and salmon stream management, and while he was in Montana, he studied the feasibility of dams on the North and Middle Forks of the Flathead River. He has been with the Wilderness Society the last year.
